4.55.7

Release Notes - Webdesk - Version 4.55.7 - January 16, 2024

Bug Fix

- [WD-16404[1]] - Fix for an issue in the access permission request caused by the incorrect interpretation of a field in the request form, which prevented scrolling in this field
- [WD-16414[2]] - Fix for an issue in the attendance list that blocked the correct display of all person data when absence reasons were pseudonymized
- [WD-16542[3]] - Fix for an issue in the HR Expert report "Employee List" when it was used in Webdesk

Improvements

- [WD-16540[4]] - Improvement in the area of approval checks by extending caching and avoiding repeated disk access for data that has already been cached
