4.55.11

Release Notes - Webdesk - Version 4.55.11 - January 22, 2024

Bug Fix

- [WD-16538[1]] - Fix for an issue that led to a NonUniqueObjectException, causing objects to be given the same ID. This issue occurred in the admin area when creating new persons, organizational units, and cost centers
- [WD-16559[2]] - Fix for an issue that caused some jobs or connectors to interpret the customer assignment as a general selection of all persons of this customer

Improvement

- [WD-16522[3]] - From now on, it is possible to restrict the recalculation of time tracking data by entering a minimum date from which a recalculation of a person's time data is possible. An earlier settlement date is thereby blocked
