4.55.12

Release Notes - Webdesk - Version 4.55.12 - January 29, 2024

Bug Fix

- [WD-16179[1]] - Fix for a regression in the process ta_assignDailyRight.proc that caused only the date of the interval end to be taken over when an interval of two or more days was entered in the overtime request
- [WD-16333[2]] - Fix for an issue that caused workflows to be assigned incorrectly when switching to another user, which could also lead to incorrect processing results of these workflows. Using ESC to bypass the notice window "Your session has expired" is no longer possible.
- [WD-16553[3]] - Fix for a regression in ta_doBooking that prevented comments from being displayed in ta_getOrgJournal (monthly journal)
- [WD-15919[4]] - Fix for a customer-specific issue that occurred when creating reminder emails
- [WD-16502[5]] - Fix for an issue that caused vacation days to be displayed with incorrect decimal values under "Master Data / Accounts" in the "Vacation Accounts" block.

Correction

- [WD-14519[6]] - Corrections in the HR Expert/Reports area: the title of the report "Org Unit Changes" was changed to "Changes Between Organizational Units". Likewise, the label "Mode" in the search form of this report was changed to "Variant".
