4.56

Release Notes - Webdesk - Version 4.56 - February 22, 2024

Bug Fix

- [WD-16292[1]] - Fix for an issue in the action hr_editJobLevelTaskAssignment that caused the list of available career levels in the action not to take the caller's client into account when displaying the list of available career levels.
- [WD-16473[2]] - Fix for an issue in the action hr_editJobLevelTaskAssignment that caused the list of available career levels not to take the caller's client into account when displaying the tasks of a selected job.
- [WD-16457[3]] - Fix for a regression in the action hr_editJobLevelTaskAssignment that caused completed tasks to still be displayed and saved for renewed approval as soon as a user restarted the process for retrieving tasks.
- [WD-15067[4]] - Fix for an issue in the (monthly) journal that caused the time frame data and the time value of intervals not to be displayed on one line.
- [WD-16089[5]] - Fix for an issue in the PoPersonConnector that prevented persons from being imported as soon as their data contained an active assignment to multiple groups and at least one of these group assignments was mandatory.
- [WD-16097[6]] - The date selection field, which was too small for input due to an error, was enlarged in all views and reports based on orgJournal.
- [WD-16176[7]] - Fix for an issue in HR Expert, in the HrPersonEditior, that prevented recording a re-entry of persons if only an active secondary employment status had previously been recorded for them.

Improvements

- [WD-16091[8]] - The icon for the button for adding documents to travel expense reports was made more meaningful.
- [WD-16174[9]] - If new absence entries overwrite existing absence entries, a correction comment showing the overwritten data of the previous absence entries is now created automatically.
- [WD-16349[10]] - From now on, it is no longer possible to start a new password reset if the process of a previously initiated password reset for the same person has not yet been completed. An appropriate error message is now displayed when such an attempt is made.
- [WD-15855[11]] - Improvement of the action selection in the editing block of open tasks ("Cancel", "Delete", "Edit", etc.) by increasing the spacing between the options

Improvements in the mobile version

- [WD-16078[12]] - Improved appearance of the absence request
- [WD-16082[13]] - Improved appearance of the daily permissions
- [WD-16083[14]] - Improved appearance of the account correction
- [WD-15983[15]] - Improved appearance of the time correction
- [WD-16446[16]] - New design of the buttons ("Edit", "Comment", etc.) in the "Open Tasks" function
- [WD-16039[17]] - Improved function of the user settings for editing through better use of the screen space
