Filter for Irregularities in Time Tracking

General

With this report it is possible to filter out and display various conflicts in the time booking data, such as capping of the daily working time due to exceeding the maximum working time, missed break bookings, and others.

You can find a description of the search form and of features such as filtering and hiding HERE[1].

The extended use of filters is described under "Using Filters in Report Search Forms[2]".

Column names

- FB = Reason for incorrect bookings
- Bookings (based on actual working time)
- FE = Absence reason abbreviation
- Absence reason
- Target time
- Creditable attendance
