4.58.13

Release Notes - Webdesk - Version 4.58.13 - October 3, 2024

Bug Fixes

- [WD-17004[1]] - Fix for an issue that prevented changed settings for the text encoding (Read Charset) of files from being saved permanently
- [WD-17405[2]] - Fix for an issue that caused absence reasons that should have been blocked for certain users to still be bookable on the dashboard
- [WD-17523[3]] - Fix for an issue in HR Expert that prevented saving newly created persons for whom neither jobs nor positions were created but for whom certain parameters were nevertheless set
- [WD-17561[4]] - Fix for an issue that prevented saving FormCustomization
- [WD-16683[5]] - Fix for an issue that allowed users who were not assigned the role $MobileApps-Users to use the JQM mobile apps anyway
- [WD-17433[6]] -Fix for an issue that prevented the uninterrupted connection between Webdesk and groupware due to a missing ongoing refresh of the refresh token
- [WD-17449[7]] - Fix for an issue in the System Messages area that caused the client selection field to be displayed even when access to only one client existed
- [WD-17499[8]] - Fix for an issue in the action ta_showTimeModels that made it impossible to filter by daily target time in the overview of daily programs
