4.58.26

Release Notes - Webdesk - Version 4.58.26 - December 3, 2024

Bug Fixes

- [WD-17812[1]] - Fix for an issue in the receipt capture for travel expenses that prevented correct capture for travel dates affected by the statutory change to the daily rates
- [WD-17936[2]] - Fix for an issue on the dashboard that created an absence interval instead of simply clocking out
- [WD-17638[3]] - Fix for an issue in HR Expert that caused persons with an active secondary employment status starting in the future not to be displayed in the Persons overview
- [WD-17902[4]] - Fix for an issue that prevented clocking in via the dashboard from triggering an automatic start of the Project Time booking
- [WD-17945[5]] - Fix for an issue in HR Expert that blocked the display of folders in the "Documents" tab of the person data
- [WD-17947[6]] - Correction to the input field for the region in the travel expense report. It is now a required field.
- [WD-17955[7]] - Fix for an issue in Event Management that allowed files containing malware to be uploaded and saved under certain conditions
- [WD-17956[8]] - A necessary update of Bootstrap from version 4.3.1 was performed

Improvement

- [WD-17535[9]] - The buttons for attendance booking on the dashboard have been redesigned: when you click "Present", the color of the button surface changes to make it look "pressed".
