4.58.30

Release Notes - Webdesk - Version 4.58.30 - December 31, 2024

Bug Fixes

- [WD-18056[1]] - Fix for an issue that caused a link to the data source to be embedded in Word documents created from HR Expert; because this link did not work, an error was displayed when trying to open the file
- [WD-18080[2]] - Fix for an issue in the monthly journal that blocked the display of data in the "Summary" block
- [WD-18083[3]] - Fix for an issue that occurred in the action for recording project time expenditures (po_editTimeEfforts) in the month view: when switching from the last calendar week of 2024 to the first of 2025, the week number changes but the year does not
- [WD-18052[4]] - Fix for an issue in business trip settlement that caused the appropriate designation customary in Germany for the text fields "Nächtigungsgelder Inland" and "Nächtigungsgelder Ausland" (domestic and international overnight allowances) not to be displayed, even when the correct language setting de_DE was selected

Improvement

- [WD-16730[5]], [WD-17846[6]] - Improvement in the Correction Client/Day View: from now on, comments can also be entered on days on which no time correction was made.
