4.59.16

Release Notes - Webdesk - Version 4.59.16 - March 26, 2025

Bug Fixes

Repository and Connector Management

- [WD-18557[1]] - Editing of Summarize connectors was no longer possible. The configurations could not be edited.
- [WD-18401[2]] - The default connection in repositories could not be changed.
- [WD-18410[3]] - Changing the password for a created repository was not possible.
- [WD-18537[4]] - Refreshing pages for new CMIS repositories failed.

Absence Management

- [WD-18553[5]] - Fixed an error message when opening "Details" of a vacation request in the workflow due to a missing calculation of vacation usage.

Group Calendar

- [WD-18506[6]] - Fixed an error when clicking on absences in the group calendar due to a missing GW license.

Message Editor

- [WD-18558[7]] - Fixed an error message when opening the message editor due to multiple entries in the recipient list for approvable messages.
