4.59.21

Release Notes - Webdesk - Version 4.59.21 - April 9, 2025

Bug Fixes

- [WD-18598[1]] - In the Excel export of the project time report, fractions of minutes in the column for industrial minutes were not displayed correctly. As a result, recorded times such as 2:45 hours (2.75 industrial minutes) could be exported incorrectly, which made correct billing more difficult.
- [WD-18580[2]] - After the update, important information was missing at kiosks on the "My Info" page: the organizational unit in the dropdown menu, color legends and color coding of absence reasons in the time bar chart, as well as values for fields such as the part-time factor.

Improvements

- [WD-18520[3]] - The definition of per diem definitions was extended to support additional time categories for the German foreign travel calculation. The tiers "more than 11 hours" and "between 8 and 11 hours" have been newly added.
