4.60.4

Release Notes - Webdesk - Version 4.60.3 - June 10, 2025

Improvements

- [WD-18686[1]] - A new setting was introduced that allows admins to enable or disable the function for acknowledgeable messages on a per-client basis. The option is disabled by default.

Bug Fixes

Display Issues and Visual Behavior

- [WD-18896[2]] - In the mobile view of the project time editing form (*po_editTimeEfforts*), active buttons were incorrectly displayed in red.
- [WD-18898[3]] - In the mobile view of JournalV2 actions, the "Absence Reason" column was not always displayed correctly.
- [WD-18760[4]] - In certain evaluations (*ta_getOrgJournal*), the total row was missing in the header in the PDF and print version. It is now displayed correctly again.
- [WD-17868[5]] - For employees with a future start date for time recording, an endless loading problem occurred in the journal. The display was adjusted to handle such cases reliably.

Technical Errors

- [WD-18853[6]] - Fixed an error message during cache replication.
- [WD-18931[7]] - Fixed an error message when opening HRX.
