4.59.24

Release Notes - Webdesk - Version 4.59.24 - April 29, 2025

Improvements

- [WD-18632[1]] - The header on the welcome page was previously hard-coded. A variable was introduced to make it customizable as part of the branding options.

Bug Fixes

- [WD-17220[2]] - In HR Expert, the person creation dialog could not be scrolled when the content exceeded the visible area.
- [WD-18677[3]] - An error message occurred in the simplified person creation, which meant that no new users could be created.
- [WD-18595[4]] - When selecting multiple VAT rates, the decimal separator was applied incorrectly.
- [WD-18592[5]] - 0-minute bookings incorrectly prevented the submission of the monthly journal.
- [WD-18611[6]] - Planned absences were not displayed in red in the absence client as intended.
- [WD-18291[7]] - In the simplified Appraisal Interview workflow, open items were resolved: scheduling an appointment is now mandatory, leaving the process is allowed under certain conditions, questionnaires and irrelevant fields can be hidden, and the observation period is prefilled sensibly.
- [WD-17066[8]] - The color of the icon in the form did not match the upper area and was corrected accordingly.
- [WD-14211[9]] - The comparison of standard process definitions at server startup always failed even though there were no changes.
- [WD-18718[10]] - The calendar synchronization generated faulty calendar data.
- [WD-18378[11]] - For future virtual entry dates, an error message occurred in the "Employment over 15 Years" report.
- [WD-18489[12]] - When printing JournalV2 views in Chrome, the selection of the page orientation (portrait/landscape) was not available.
