4.60.5

Release Notes - Webdesk - Version 4.60.5 - June 12, 2025

Improvement

- [WD-18927[1]] - The interaction in the travel expense report form ("Main Data" tab) was sped up. Changes of periods or travel types are now considerably more responsive. The initial loading time of the form was also improved.

Bug Fixes

- [WD-18975[2]] - Fixed an error in the Excel export that caused an error message for certain queries with *null* values.
- [WD-18803[3]] - In the overview of the expense report definitions in travel management, historized definitions were incorrectly displayed. From now on, only the currently valid definition is shown in the "Expense Report Definitions" view.
