4.60.9

Release Notes - Webdesk - Version 4.60.9 - June 18, 2025

Bug Fixes

- [WD-19034[1]] - In project time tracking, it was previously not possible to change the project for rejected entries. Users could only adjust time and comment, which made proper rework difficult. This behavior was changed: Changing the project is now also possible for rejected entries.
- [WD-19037[2]] - An error message occurred when editing certain business errand requests in the travel requests. It was triggered by an error when loading the editing form.
