4.60.13

Release Notes - Webdesk - Version 4.60.13 - July 10, 2025

Improvements

- [WD-19064[1]] - The "Inheritance to subgroups" option was moved closer to the group selection to improve usability and make the assignment more intuitive.

Bug Fixes

- [WD-17451[2]] - In certain cases, an error message was displayed when saving longer absence periods in the absence client. The absence change was delayed or not applied at all. This behavior occurred, for example, with sick leave or parental leave, but not with vacation.
- [WD-18767[3]] - An error message was displayed on every access to the dashboard, which significantly impaired usage.
