4.60.24

Release Notes - Webdesk - Version 4.60.24 - September 1, 2025

Bug Fixes

- [WD-19395[1]] - Fixed an issue when starting up Webdesk in clusterized systems.
- [WD-19241[2]] - Opening the "Supervisor" role by a customer-specific admin took an unusually long time (up to 30 seconds). The loading time was significantly improved.
- [WD-19316[3]] - When trying to create a favorite from an existing project time booking, it was apparently created but did not appear in the favorites list.
- [WD-19335[4]] - An error message with a stack trace occurred when running the synchronization job. This issue has been fixed.
