4.61.1

Release Notes - Webdesk - Version 4.61.1 - September 30, 2025

New Features

Webdesk Logout – SSO Integration

- [WD-18920[1]] - Introduction of a new system option and optional client option to trigger an additional URL when logging out of Webdesk (e.g. to log out from external authentication providers).
- [WD-18921[2]] - A static logout page was implemented that is displayed to the user after a successful logout via SSO.

Improvements

Client and SSO Configuration

- [WD-18396[3]] - A new setting was introduced for configuring a client-specific Webdesk URL, which is now also used in emails.
- [WD-19444[4]] - It is now possible to completely disable login via user name/password as well as password reset for SSO clients.

Bug Fixes

SSO & Authentication

- [WD-19414[5]] - Fix for an issue where login to Webdesk failed when SSO and two-factor authentication were enabled at the same time.

Other Bug Fixes

- [WD-19433[6]] - An error message occurred when an HR Expert user without local admin rights opened the organization tree.
- [WD-19406[7]] - Correction comments in the correction client were no longer displayed when a correction was made to an account with the unit "h" (hours).
- [WD-19403[8]] - When creating on-call duties on weekends, an overlap message was incorrectly displayed although there were no conflicts.
- [WD-18395[9]] - When system administrators edited groups, persons of other clients were also displayed in the person selection field.
