Update 2025-11-04 (4.61.7)

Updated to version 4.61.7[1].

Improvements

Login and Security

- Users who log in via single sign-on (SSO) no longer have to complete additional two-factor authentication. Security remains fully ensured by the external SSO login.
- When logging in via SSO, the system now checks whether the accessed web address matches the actual login address. This serves as an additional security measure.

More Reliable Email Management:

- When forwarding rules are deleted, the system now ensures that they have actually been removed in Microsoft O365. This makes synchronization more stable and avoids incorrect status messages.

Clearer Salary Reports in HR-Expert:

- The column labels for the 13th and 14th salary have been revised. Depending on the setting, either "13 + 14" or just "13" is now displayed, for a clearer and more understandable presentation.

Additional bug fixes were also made.
