4.61.13

Release Notes - Webdesk - Version 4.61.13 - undefined

Improvements

User Management

- [WD-19756[1]] - Improved data security: When saving already used email addresses, user details are no longer displayed.

Bug Fixes

Project Time Tracking

- [WD-19704[2]] - Fix for a display issue where the booking popup in project time tracking was overlapped by the menu.

Reporting

- [WD-19824[3]] - Fix for an issue in the journal overview where all columns were summed instead of only the configured ones.

Miscellaneous

- [WD-19834[4]] - Setup of the BMD import interface for BDO customers for improved data integration.
