4.61.14

Release Notes - Webdesk - Version 4.61.14 - December 9, 2025

Improvements

User Management

- [WD-19756[1]] - Improved validation texts in the person editing form

Bug Fixes

Time Tracking

- [WD-19666[2]] - Fix for a search issue in the settings where irrelevant panels were displayed even though they contained no matching results.
- [WD-18571[3]] - Reactivation and correction of the highlighting of search results in the category filter in the time tracking settings.

Project Time Tracking

- [WD-19832[4]] - Fix for an issue where not all absences with multiple intervals were displayed correctly in the annual calendar.

Interfaces

- [WD-19757[5]] - Fix for the group and person assignment, which could cause error messages when using a DBConnector.

Miscellaneous

- [WD-19845[6]] - Fix for an issue where date picker fields in the kiosk iframe were not displayed in the mobile view.
