4.62.9

Release Notes - Webdesk - Version 4.62.9 - January 22, 2026

Bug Fixes

HR Expert

- [WD-20080[1]] - Fix for an issue where the automatic start of the social security deregistration process upon termination was executed regardless of the client configuration. The workflow is now only started if the option for social security registrations is enabled.

Miscellaneous

- [WD-19834[2]] - Configuration and optimization of the BMD import interface for BDO clients, including adjustments to the client setup and improvements to processes for data transfer and social security reporting.
