4.63.2

Release Notes - Webdesk - Version 4.63.2 - February 10, 2026

Improvements

Time & Attendance

- [WD-20046[1]] - Improvement of the monthly approval so that inactive clients no longer receive reminder notifications.
- [WD-17558[2]] - The display/calculation of the current remaining vacation in the vacation request now also supports calculation based on hours

Bug Fixes

Time & Attendance

- [WD-20069[3]] - Fix for an error message when opening the time settings in person management.
- [WD-20154[4]] - Fix for an issue where personal field groups were not displayed in the saved order.

Reporting

- [WD-19739[5]] - Fix for an issue in the report selection where persons were not sorted alphabetically.

Mobile App

- [WD-19954[6]] - Fix for a display error in the Android app where header text was not visible because of a white background.

Fingerprint

- [WD-20087[7]] - Database column in the fingerprint record renamed to avoid conflicts with reserved keywords.

Performance

- [WD-20117[8]] - Fix for an error where the Previous and Next buttons in the workflow list no longer triggered page changes.
