4.64.1

Release Notes - Webdesk - Version 4.64.1 - June 16, 2026

Improvements

Time & Attendance

- [WD-20729[1]] - The column label "Groupware" was replaced with the more understandable label "Availability".
- [WD-20726[2]] - The display of the name column was improved so that names and titles are presented more clearly depending on the sort order.

Travel Expense Tracking

- [WD-20925[3]] - Optimization of the print view of trips by reducing colored backgrounds and removing unnecessary blank pages.
- [WD-20858[4]] - Improvement of the display of the receipt form for travel expenses on tablets so that all input fields are displayed correctly.
- [WD-20695[5]] - For international trips, the trip segment is now prefilled automatically if the destination region and start region are different.
- [WD-20269[6]] - Multiple attachments per special receipt can now be added, sorted, and managed in the travel expense report.

Administration

- [WD-20799[7]] - Renaming of the role SecurityOfficer to SafetyOfficer and adjustment of all associated workflows and references.

UI / UX

- [WD-20477[8]] - The usability of the sliders was improved by increasing the clickable area and ease of operation.

Other Improvements

- [WD-21044[9]] - Revision of the commit functionality with extended guidelines and improvements for the commit workflow.
- [WD-20986[10]] - Introduction of a step-by-step check for null values to improve code quality.
- [WD-20978[11]] - Extension of the internal test coverage for cache providers to improve reliability.
- [WD-20793[12]] - Internal optimization of the dependency structure to improve maintainability.

Bug Fixes

Time & Attendance

- [WD-21018[13]] - Fix for an issue where the label for monthly approvals was not displayed in translated form in the report.
- [WD-20998[14]] - Fix for an issue where the target working time was not saved correctly when creating a new daily program.
- [WD-20421[15]] - Fix for a display issue where a white gap was displayed after the status column.

Project Time Tracking

- [WD-20617[16]] - Fix for an issue where the Save button remained disabled after deleting entries in the monthly timesheet; in addition, a function for removing all entries of a month was added.
- [WD-20265[17]] - Fix for a display issue when editing monthly timesheets so that all input fields and actions are aligned consistently.

Travel Expense Tracking

- [WD-20982[18]] - Fix for an issue where, in the configuration of the travel type, the fields in the expenses area were not labeled correctly and the layout was displayed incorrectly.
- [WD-20845[19]] - Fix for an issue where starting a travel expense process was not possible in rare cases.
- [WD-20442[20]] - Fix for an issue where VAT labels were displayed even though no tax codes are configured for the receipt type.

Administration

- [WD-21036[21]] - Fix for an issue where editing system messages in the production system resulted in an error message.
- [WD-20968[22]] - Fix for an issue where, under certain circumstances, person data could be overwritten incorrectly.

Interfaces

- [WD-20875[23]] - Fix for an issue where placeholders in file paths were not replaced correctly when storing reports via SFTP.

Other Bug Fixes

- [WD-21033[24]] - Fix for stability issues of the Tacon subsystem after prolonged inactivity.
- [WD-21025[25]] - Fix for an issue where the Tacon subsystem was repeatedly unavailable in the internal system.
- [WD-20987[26]] - Fix for an issue where newly created regions could not be saved for the legislation assignment.
- [WD-20225[27]] - Security issue fixed that allowed potentially unsafe scripts to be executed during scheduling.

Miscellaneous

- [WD-21046[28]] - Extension of the classifiers for regional allowances with special variants for German customers.
- [WD-20993[29]] - Provision of a tool for creating a standardized SBOM for Webdesk.
