Update 2026-06-18 (4.64.3)

Updated to version 4.64.3: includes the key changes of 4.64 plus hotfixes up to 4.64.3

Key New Features

General

- Login: New look + two-step login: 1) Enter username # 2) a) Enter password or b) redirect to SSO.

Time

- Personalwolke-Time[1] # People[2]
  - Activating time tracking[3] now allows a copy of another person[4]
  - Can now create and manage multiple employments[5]
    - Secondary employment alongside primary employment
    - e.g., marginal part-time employment while the main employment is dormant due to parental leave
    - Previously only in Personalwolke-HR-Expert[6] via employment statuses[7]
- Personalwolke-Time[8] # Option "Start of time tracking may be postponed to a later date"
  - If YES: HR administrators may postpone the start of time tracking to a later date and must confirm the resulting data deletion in a dialog.
- The annual calendar now supports creating requests
- The annual calendar now supports a rough calculation of vacation usage

Project-Time

- Favorites now indicate when they can no longer be booked
- Project selection dialogs now show a clear message when no bookable projects exist
- The Edit Project Time action can now display a preliminary estimated total for the current day

Travel

- The "Receipts" tab can now be hidden via the trip type configuration

HR-Expert

- New dashlet "Anniversaries" that shows upcoming birthdays in 5-year increments
- New checkbox-based implementation for report parameters

Kiosk

- Project list is now paginated
- New function to add all top-level projects of a client to a kiosk

Administration / Data Interfaces

- The ExecuteAndStoreReports job can now upload generated reports directly to SFTP servers
- New option in dbConnector "Clear target table"

    - The target table is completely emptied and refilled before each run
- SeperatorFileConnector now supports the UTF-8 + BOM file format
