4.64.7

Release Notes - Webdesk - Version 4.64.7 - June 22, 2026

Improvements

Time & Attendance

- [WD-21121[1]] - Improvement of the interface for providing account definitions by introducing a unique REST model and removing technical workarounds.

Other Improvements

- [WD-18326[2]] - Extension of the scripting console with support for Velocity and SQL scripts as well as improvements to the user interface and functionality.

Bug Fixes

Time & Attendance

- [WD-21129[3]] - Fix for an issue where an error could occur when retrieving time tracking accounts for users without a first accounting day.
- [WD-21124[4]] - Fix for an issue where creating a new absence interval was not possible.
- [WD-21119[5]] - Fix for an issue where the assignment between persons and time tracking was partially missing in the user interface.
- [WD-20313[6]] - Fix for an issue where personal fields in the time tracking configuration appeared to be saved but were not permanently applied.

Travel Expense Tracking

- [WD-21123[7]] - Fix for an issue where the amount entered in receipt items could change incorrectly after switching between tabs.

Permissions

- [WD-21065[8]] - Fix for an issue where local administrators could not see requests from subgroups in the group filter under wfLists.
