4.64.13

Release Notes - Webdesk - Version 4.64.13 - July 2, 2026

Improvements

Time & Attendance

- [WD-21174[1]] - The booking user interface is now read-only if the start of time tracking is in the future.

UI / UX

- [WD-19941[2]] - Introduction of a uniform display when the server is unreachable or a network interruption occurs.

Bug Fixes

Time & Attendance

- [WD-21275[3]] - Fix for an issue where the day view with rescheduling could not be opened in the correction client.
- [WD-21269[4]] - Fix for an issue where the key figures of the daily programs were not displayed in the day view, making rescheduling impossible.
- [WD-18342[5]] - Fix for an issue when loading the to-dos in the dashboard for the first time after a server restart.

Project Time Tracking

- [WD-21278[6]] - Optimization of the load time when opening project time tracking through improved caching of permissions.
- [WD-21272[7]] - Performance optimization for large numbers of projects in project time tracking by adjusting the caches.
- [WD-21252[8]] - Fix for an issue with very long load times when opening and managing projects with a large number of projects.
- [WD-21251[9]] - Fix for an issue that could cause loading of project time tracking to fail when the project hierarchy cache was unavailable.
- [WD-21204[10]] - Fix for an issue where non-bookable projects could be selected in project time tracking, resulting in an error.

HR Expert

- [WD-21234[11]] - Fix for an issue where the HR Expert area could not be opened with special settings.

Login / Logout

- [WD-19940[12]] - Fix for an issue with automatic re-login after a longer period of inactivity in the SSO area.

Other Bug Fixes

- [WD-21198[13]] - Fix for an issue that could lead to an error when updating cache entries.
