4.64.22

Release Notes - Webdesk - Version 4.64.22 - July 23, 2026

Improvements

Performance

- [WD-21509[1]] - Optimization of load times when displaying the attendance board for large groups of persons.
- [WD-21391[2]] - Performance improvement for faster display of menu items.

Bug Fixes

Time & Attendance

- [WD-21586[3]] - Fix for a performance issue when synchronizing person data in time tracking through optimized processing of audit entries.
- [WD-19932[4]] - Fix for an issue where an error message was displayed when changing the month in the correction client while editing a row.

Travel Expense Tracking

- [WD-21618[5]] - Fix for an issue where receipts with an amount of 0.00 EUR were not displayed in the detail view of the travel expense report.
- [WD-18768[6]] - Fix for an issue where the travel request form incorrectly displayed the "Save and Forward" button for approvers instead of "Save".

Administration

- [WD-21299[7]] - Fix for an issue where deleting a client could fail if role holders with client competence still existed.

Interfaces

- [WD-21513[8]] - Fix for an issue when uploading booking import files, where an error caused the import process to be aborted.

UI / UX

- [WD-21544[9]] - Fix for display issues with the confirmation dialog, which is now centered on mobile devices and is no longer covered by other elements.

Other Bug Fixes

- [WD-21615[10]] - Fix for an issue where outdated internal dependency declarations in the build process were not updated correctly.
- [WD-21597[11]] - Fix for an issue where errors in the background process were not sufficiently visible in the log.
- [WD-21579[12]] - Fix for an issue where starting Webdesk with certain test JARs resulted in an error.
- [WD-21578[13]] - Improved visibility of error diagnostics during the Java policy check in the CI process.

- [WD-21409[14]] - Fix for an issue in the annual calendar where unused booking reasons were also displayed even though the option was disabled.

Miscellaneous

- [WD-21577[15]] - Introduction of a rule for checking string comparisons in the Java source code to avoid errors caused by identity comparisons.
- [WD-21350[16]] - Corrections to failing automated tests in the system.
