Bug Fixes

Time & Attendance

- [WD-21833[10]] - Fix for an issue where the journal could not be loaded if a required index was missing in the 6020 connection.
- [WD-21545[11]] - Fix for an issue where columns in the Journal V2 PDF export were displayed too wide.
- [WD-21264[12]] - Fix for an issue where no error reasons could be selected in the universal correction client.

Project Time Tracking

- [WD-21835[13]] - Fix for an issue where opening project time entries of a different month could trigger a double refresh.

Reporting

- [WD-21856[14]] - Fix for an issue where the Excel export in the vacation account report got stuck and no file was created.

Interfaces

- [WD-21804[15]] - Fix for an issue where files were incorrectly already moved to the archive when loading the preview of a linked connector.

Mobile App

- [WD-19198[16]] - Fix for an issue where the time picker closed prematurely on iOS devices in the mobile app.

Kiosk

- [WD-19234[17]] - Fix for an issue where individual fingerprints could not be deleted from a fingerprint set.
- [WD-19233[18]] - Fix for an issue where deleted fingerprint sets were still displayed until the view was refreshed.

UI / UX

- [WD-21837[19]] - Fix for an issue where a duplicate path was incorrectly used for custom fonts, which could cause permission checks to fail.
- [WD-21836[20]] - Fix for an issue where custom fonts were not loaded for regular users if document permission was enabled.

Other Bug Fixes

- [WD-21530[21]] - Fix for an issue where entries without a translation were displayed in the selection list for available actions.

Miscellaneous

- [WD-21316[22]] - Introduction of dashboard templates with new management, application, and administration functions for dashboards.
