4.64.29

Release Notes - Webdesk - Version 4.64.29 - August 6, 2026

Improvements

Time & Attendance

- [WD-20504[1]] - If no match is found in the person search, the search can now be run directly across all groups.

Travel Expense Tracking

- [WD-21813[2]] - Addition of an option to calculate daily deductions for domestic trips for the company share pro rata from the amount actually paid out.

Kiosk

- [WD-18549[3]] - New setting for centrally enforcing that kiosks must adopt the Webdesk configuration.

Other Improvements

- [WD-21893[4]] - Improvement of the error report so that a description of how the error occurred is mandatory and service desk emails contain more detailed information as well as formatted presentation.

Bug Fixes

Time & Attendance

- [WD-21903[5]] - Fix for an issue where time tracking could not be activated successfully for newly created users in HR Expert.
- [WD-21900[6]] - Fix for a display issue where the TA history button was displayed even though time tracking had not yet been activated for a person or activation was still pending.

Reporting

- [WD-21896[7]] - Fix for an issue where the export of journal data could fail for certain users or periods.

Performance

- [WD-18834[8]] - Performance optimization when displaying and editing to-do lists and approval workflows.
