4.64.32

Release Notes - Webdesk - Version 4.64.32 - August 18, 2026

Improvements

Other Improvements

- [WD-22006[1]] - Adjustment of the edit icons to a standardized display for a more consistent user interface.

Bug Fixes

Time & Attendance

- [WD-22011[2]] - Fix for an issue with the selection of the base weekly program, as a result of which the program name was not displayed in the selection list.
- [WD-22009[3]] - Fix for an issue where the context menu was not displayed in the table view of the attendance board.

HR Expert

- [WD-21091[4]] - Fix for an issue where the exit date was incorrectly set during automatic person creation.

Reporting

- [WD-22023[5]] - Fix for an issue with export runs where the export could get stuck after logout.

Administration

- [WD-22005[6]] - Fix for an issue where clicking rows in the display of active jobs accidentally opened the job editor and blocked other controls.

Login / Logout

- [WD-22036[7]] - Fix for an issue where incorrectly formatted links after login could cause further use to be aborted. Incorrectly formatted links now lead to an invalid page.

Performance

- [WD-22007[8]] - Fix for a memory issue that could lead to greatly increased load and slowed system performance.
- [WD-22008[9]] - Fix for an issue where the application failed to start.

UI / UX

- [WD-21762[10]] - Display improvement in the mobile version: colors and spacing of icons and controls have been standardized.

Miscellaneous

- [WD-21290[11]] - Addition of a help text for the 'Notify Author' field in the process editor for a better understanding of the selection options.
