4.64.36

Release Notes - Webdesk - Version 4.64.36 - September 1, 2026

Bug Fixes

Time & Attendance

- [WD-22180[1]] - Fix for an issue where the selection screen for team attendance closed prematurely after the filter setting was changed.

Project Time Tracking

- [WD-22226[2]] - Fix for an issue where time could still be booked to non-bookable projects via dashboard favorites.

Travel Expense Tracking

- [WD-21603[3]] - Fix for a display issue with error messages in the receipts section of travel expense tracking on Microsoft Surface devices.

HR Expert

- [WD-22227[4]] - Fix for an issue where Webdesk could not be started with the HR module enabled.

User Settings

- [WD-22140[5]] - Fix for an issue where, for certain customers, the user settings could not be opened and the substitute tab was missing.

UI / UX

- [WD-22228[6]] - Fix for an issue where the error color was not displayed correctly when using the Webdesk branding in the V2024 theme.

Other Bug Fixes

- [WD-22150[7]] - Fix for an issue where the number of entries and pages was not displayed correctly after refreshing a filtered task list.
- [WD-21922[8]] - Fix for an issue in the error detection of IF6020 PLI scripts so that errors are now reported correctly.
