4.64.45

Release Notes - Webdesk - Version 4.64.45 - September 29, 2026

Improvements

Time & Attendance

- [WD-22598[1]] - New function for displaying in which configurations a particular IF6020 error reason is used.
- [WD-22535[2]] - Improvement of the absence and booking reason lists through searchable columns and an optimized column layout for easier use.
- [WD-22322[3]] - Improvement of the display options when displaying personnel data: it is now possible to add empty rows with individually configurable text for better structuring.
- [WD-22072[4]] - Extension of the wage type management with the option to adopt preset, non-editable values from time accounts and to perform a de-factorization on the target time account.
- [WD-18156[5]] - A configurable option was added to control the visibility of the vacation calculation for individual roles in the approval process.

Interfaces

- [WD-22514[6]] - Extension of the TmTravelConnector so that travel requests can now also be read and processed further.

UI / UX

- [WD-21407[7]] - Improvement of the user interface for conflict-free use of different interactions in the annual calendar.

Other Improvements

- [WD-20978[8]] - Extension of the internal test coverage to improve the stability and reliability of the system.

Bug Fixes

Time & Attendance

- [WD-22599[9]] - Fix for an issue where pending absence requests were displayed twice in the annual calendar.
- [WD-22597[10]] - Fix for an issue in the display of vacation statistics where approved future vacation days were incorrectly shown as already used.
- [WD-22434[11]] - Fix for an issue where, after a rehire in the HRX module, the time tracking person was not created correctly, which could lead to error messages in the person editor.

Travel Expense Tracking

- [WD-22532[12]] - Fix for an issue where the calculation of daily allowances did not update when editing a travel expense report with incomplete trip data.

User Settings

- [WD-22521[13]] - Fix for an issue where a change of the profile picture was not reflected in the avatar in the header.

Performance

- [WD-22294[14]] - Fix for an issue where requests could be blocked for a very long time due to aborted database connections.
- [WD-21987[15]] - Fix for an issue where the cluster status heartbeat could cause unnecessarily high CPU load by repeatedly scanning all Redis sessions.

UI / UX

- [WD-21864[16]] - Fix for a display issue where the absence inspector in the annual calendar was not displayed correctly above the calendar on tablets.

Other Bug Fixes

- [WD-22636[17]] - Fix for an issue where no data was displayed when opening detail views in workflows.
- [WD-22619[18]] - Fix for an issue where reminder emails were no longer sent.
- [WD-22232[19]] - Fix for a memory issue where unreleased Hibernate sessions could lead to increased memory consumption.

Miscellaneous

- [WD-22524[20]] - New tool for developers to easily switch the Codex backend between different providers.
- [WD-22320[21]] - Migration of the test environment to JUnit Jupiter to improve test structure and maintainability.
- [WD-22229[22]] - Optimization of the test environment: multiple test runs can now share a common MySQL test environment.
- [WD-21993[23]] - Migration of the HR implementation tests to reusable Webdesk contexts to improve test structure and maintainability.
