Booking List

This query allows the user to run a department-specific query of the **booking journal** of a specific group of persons.
Depending on the configuration, the query can be made for a **day** or for a **period**.

The departments (**organization chart**) available to the logged-in user are determined by the administrator. The selection of organizational units for displaying the desired list or evaluation is made in all menu items via the organization chart or the favorites list (see chapter **Management**).

By clicking the monthly journal icon, the supervisor gets a detailed overview of the monthly journal of the selected employee.
