

## 4.18.0

Release Notes - Webdesk - Version 4.18.0

---

### Bug

- [[WD-11664](#)<sup>1</sup>] - Avoid NPE when opening `ptm_editTimeEfforts.act` with TA integration but no running TA connector
- [[WD-11808](#)<sup>2</sup>] - `GetOrgJournal`: Header displays "Invalid date - Invalid date"
- [[WD-11823](#)<sup>3</sup>] - Client side report javascript column does not calculate value for every row individually
- [[WD-11883](#)<sup>4</sup>] - Missing Pagination in list of system messages
- [[WD-11958](#)<sup>5</sup>] - Preloading images should not block application
- [[WD-11975](#)<sup>6</sup>] - Error when opening start Page with react journal
- [[WD-11980](#)<sup>7</sup>] - `EditLegislation` dependency bugs and missing success message
- [[WD-12010](#)<sup>8</sup>] - Error when switching back to initial user
- [[WD-12015](#)<sup>9</sup>] - Exception when opening calendar with GraphAPI GW
- [[WD-12019](#)<sup>10</sup>] - User can filter for ANY client in `po_showExternalAPIs`
- [[WD-12047](#)<sup>11</sup>] - Hide External API panel from user settings if there are none to configure
- [[WD-12053](#)<sup>12</sup>] - Graph API does not work with correct `PoOptions.webdeskURL` parameter
- [[WD-12054](#)<sup>13</sup>] - Unable to delete External API if its already in use
- [[WD-12055](#)<sup>14</sup>] - Error when opening calendar with MS Graph API
- [[WD-12060](#)<sup>15</sup>] - Exception thrown when opening calendar without using ExternalAPI when one is available
- [[WD-12061](#)<sup>16</sup>] - FreeBusy column does not work with MS GraphAPI
- [[WD-12063](#)<sup>17</sup>] - Opening calendar fails due to incorrect client secret when using Graph API
- [[WD-12067](#)<sup>18</sup>] - `IllegalStateException`: No time zones information for `<username>`
- [[WD-12080](#)<sup>19</sup>] - Exception when opening Calendar with specific event
- [[WD-12081](#)<sup>20</sup>] - Exception when opening Calendar with a person not using GW
- [[WD-12085](#)<sup>21</sup>] - Do a validation when saving a `PoExternalAPI` instead of throwing an exception
- [[WD-12093](#)<sup>22</sup>] - Exception when running the job `SyncCalendarDates`
- [[WD-12095](#)<sup>23</sup>] - NPE when opening `userSettings` and `PoOptions.webdeskURL` is null

### New Feature

- [[WD-11461](#)<sup>24</sup>] - Attendance Tableau: Groupware appointments React Component
- [[WD-11463](#)<sup>25</sup>] - Attendance Tableau: Person "Card" React Component
- [[WD-11504](#)<sup>26</sup>] - Implement column sorting in `WdTable`
- [[WD-11514](#)<sup>27</sup>] - Implementation of `GwCalendarService` using MS GraphAPI
- [[WD-11515](#)<sup>28</sup>] - Implementation of `GwUtilService` using MS GraphAPI
- [[WD-11516](#)<sup>29</sup>] - Store a user's login token coming from an OAuth authentication process of some service
- [[WD-11595](#)<sup>30</sup>] - Absence-Entry calculation of `absencereason` specific open days (f.i. Home Office) - MCE

- [[WD-11893](#)<sup>31</sup>] - Write test cases for extension of timelines with share and type relations

## Task

- [[WD-11073](#)<sup>32</sup>] - Devops: tests are not running on webdesk-xx-webclient projects
- [[WD-11492](#)<sup>33</sup>] - Move ShowComponentWrapper + Tabs from testReact po action to public components
- [[WD-11512](#)<sup>34</sup>] - Image Component: use Dyna Image to render image with correct dimensions
- [[WD-11800](#)<sup>35</sup>] - POC for export React Table from Server
- [[WD-11831](#)<sup>36</sup>] - EVM Websdk project
- [[WD-11832](#)<sup>37</sup>] - Base Restendpoints and Typescript webdesk Services for event masterdata
- [[WD-11833](#)<sup>38</sup>] - PoC for Communication MVP <-> React
- [[WD-11842](#)<sup>39</sup>] - ReservationRow React component
- [[WD-11878](#)<sup>40</sup>] - Change german i18n for group in Organisation/groups tab
- [[WD-11939](#)<sup>41</sup>] - EVM WebSDK tests
- [[WD-11978](#)<sup>42</sup>] - Test-Jars are not deployed to obelix-dev and obelix-release
- [[WD-11979](#)<sup>43</sup>] - Run Jenkins CI Maven builds in parallel
- [[WD-12051](#)<sup>44</sup>] - Translation for MS Graph Impl

## Improvement

- [[WD-11464](#)<sup>45</sup>] - Add Personalwolke logo to BIRT reports
- [[WD-11801](#)<sup>46</sup>] - GetOrgJournal: Display table skeleton while waiting for the data
- [[WD-11821](#)<sup>47</sup>] - Missing Fields in HrPositionConnector
- [[WD-11845](#)<sup>48</sup>] - testAction for react components within EVM
- [[WD-11879](#)<sup>49</sup>] - Enhance Evm Roomsearch to also return partial and non fitting results
- [[WD-11880](#)<sup>50</sup>] - Tablemanagement component/container
- [[WD-11937](#)<sup>51</sup>] - Provide list of most used resource groups
- [[WD-12008](#)<sup>52</sup>] - Make "Integrations" selection in user settings not mandatory
- [[WD-12076](#)<sup>53</sup>] - Improve error message in HrPerformEmploymentTerminations job
- [[WD-12082](#)<sup>54</sup>] - Provide access for "redirectWorkflowId" in the JS validation for process definitions

## Sub-task

- [[WD-11762](#)<sup>55</sup>] - UI for authorizing a new external service integration in the user's settings
- [[WD-11763](#)<sup>56</sup>] - UI for showing/editing external API integrations
- [[WD-11793](#)<sup>57</sup>] - New endpoint to confirm a successful external API integration
