

## 4.5.51

Release Notes - Webdesk - Version 4.5.51 -23.04.2020

---

### Bug

- [[WD-10088](#)<sup>1</sup>] - doRescheduling page: weekly interval mode has a duplicated table column which appears only on IE
- [[WD-10534](#)<sup>2</sup>] - Problems with collapsed columns on React Table
- [[WD-10744](#)<sup>3</sup>] - Bundle Tomcat version 8.5.47 in installer
- [[WD-10750](#)<sup>4</sup>] - Pagination missing in ta\_showAbsenceReasons.act
- [[WD-10761](#)<sup>5</sup>] - PDF/XSLX-Export on mobile not working with JS based implementation
- [[WD-10767](#)<sup>6</sup>] - ta\_getGroupCalender: Make query-validation into the past relative from today working again
- [[WD-10822](#)<sup>7</sup>] - NullPointer Mappings Creating Empty TravelType KmBillingsDefinition
- [[WD-10827](#)<sup>8</sup>] - Mapping Widget Person and Group isn't Validated
- [[WD-10835](#)<sup>9</sup>] - Exception EditClient Travel Management Module
- [[WD-10844](#)<sup>10</sup>] - The navigation of the pagination is not working in dialog when saving daily program
- [[WD-10855](#)<sup>11</sup>] - Sorting order of weekly programs is wrong
- [[WD-10866](#)<sup>12</sup>] - On Organigram Page, the names are unaligned and not under the Role Title
- [[WD-10877](#)<sup>13</sup>] - Wrong date autocomplete in HRX
- [[WD-10889](#)<sup>14</sup>] - Exception when trying to create a travel folder
- [[WD-10914](#)<sup>15</sup>] - PostProcessHandler is not a function
- [[WD-10926](#)<sup>16</sup>] - Creating a new daily program throws an exception
- [[WD-10952](#)<sup>17</sup>] - Exception when using lazy loading for tree-table report
- [[WD-10978](#)<sup>18</sup>] - deleteOldWfData doesn't show all processes in log
- [[WD-10979](#)<sup>19</sup>] - deleteOldWfData can't close process instances because of DB constraints
- [[WD-10983](#)<sup>20</sup>] - Exception when clicking on Save and re-run daily accounting
- [[WD-10989](#)<sup>21</sup>] - Save dialog is displayed even if daily/weekly program is saved successfully
- [[WD-10990](#)<sup>22</sup>] - Avoid loading costly list of referenced process-definitions on open of wflist
- [[WD-10997](#)<sup>23</sup>] - Invalid data (out dated) problems when using the new Journal
- [[WD-11002](#)<sup>24</sup>] - JournalV2 does not load/shows nothing
- [[WD-11003](#)<sup>25</sup>] - Booking mask brings NPE when today has full-day-absence
- [[WD-11008](#)<sup>26</sup>] - JournalV2 does not load if no accounting column is defined
- [[WD-11009](#)<sup>27</sup>] - JournalV2 not all input fields shown adding accounting column
- [[WD-11012](#)<sup>28</sup>] - JournalV2 explort has some null entries when opening with Excel
- [[WD-11018](#)<sup>29</sup>] - JournalV2 today comments are not shown
- [[WD-11025](#)<sup>30</sup>] - JournalV2 holidays miss green background
- [[WD-11030](#)<sup>31</sup>] - Booking doesn't Appear in New Journal or rest/ta/journal Endpoint
- [[WD-11038](#)<sup>32</sup>] - Raise chache size to prevent timeouts from TACon
- [[WD-11063](#)<sup>33</sup>] - Saving Ta Client Data is way too slow

## New Feature

- [WD-10368<sup>34</sup>] - Entity specific cache management
- [WD-10371<sup>35</sup>] - Cache Infrastructure for Journal V2
- [WD-10733<sup>36</sup>] - Hr-Expert page access should be logged as webdesk actions

## Task

- [WD-10511<sup>37</sup>] - Create POJO to represent WfSimpleProcessDefinition and TaAbsenceEntrySimpleProcessDefinition
- [WD-10512<sup>38</sup>] - New method to find out which Absence Reasons a person can use, based on the process definitions it has permission to
- [WD-10513<sup>39</sup>] - New model that represents an Absence Reason with the process definition metadata bound to it
- [WD-10514<sup>40</sup>] - New TaAbsenceIntervalRestEndpoint
- [WD-10515<sup>41</sup>] - New TaAbsenceReasonRestEndpoint
- [WD-10516<sup>42</sup>] - Create new service WfSimpleProcessDefinitionService
- [WD-10659<sup>43</sup>] - Refactor and Improve Action Configuration model/services
- [WD-10768<sup>44</sup>] - System messages: make it possible to easily select multiple clients as system message target
- [WD-10834<sup>45</sup>] - Improvements for React Journal release
- [WD-10859<sup>46</sup>] - Refactor TaDefinitionStatisticsService, move methods to TaPersonService
- [WD-10860<sup>47</sup>] - Remove interfaces for the DAOs in TA and rename 6020 specific DAOs to \*\*\*6020DAO
- [WD-10864<sup>48</sup>] - Research integration of React components in HRX
- [WD-10880<sup>49</sup>] - Frontend Implementation of Lazy loading in TreeTableReports
- [WD-11033<sup>50</sup>] - Added and edited translations

## Improvement

- [WD-900<sup>51</sup>] - TreeTable Reports ajaxified (webdesk/cocoon version)
- [WD-9944<sup>52</sup>] - Time columns should have the same width in "Frame", "Breaks" and "Accounts"
- [WD-9980<sup>53</sup>] - Improve Journal V2 endpoint
- [WD-9990<sup>54</sup>] - Error handling when there is a problem during the fetch of data of Journal V2
- [WD-10578<sup>55</sup>] - Make keyFieldName dynamic in WdReportTable
- [WD-10593<sup>56</sup>] - Improve Mappings Tab for definitions
- [WD-10644<sup>57</sup>] - StreetAddress validation in Travel Expense
- [WD-10680<sup>58</sup>] - Daily Time-Model maintenance should check impact and provide option to create copy
- [WD-10681<sup>59</sup>] - Allow archiving of day- and week-programs
- [WD-10722<sup>60</sup>] - Make the competence target for Role assignment prefilled if the admin user just has one client
- [WD-10759<sup>61</sup>] - Add JS State-Management for webdesk pages client-side
- [WD-10763<sup>62</sup>] - Move help messages to the right side and prevent removing target time hours when changing client when creating a new weekly program

- [[WD-10845](#)<sup>63</sup>] - Show dialog to create a copy of weekly program if they are already used (assigned)
- [[WD-10852](#)<sup>64</sup>] - Checking translations and fixing text modules
- [[WD-10856](#)<sup>65</sup>] - Logging for the job deleteOldWfData
- [[WD-10887](#)<sup>66</sup>] - Improve performance and rendering time of react journal
- [[WD-10895](#)<sup>67</sup>] - Set a realistic minimum year by default for React WdInlineYearPicker
- [[WD-10907](#)<sup>68</sup>] - Decouple websdk version from module version
- [[WD-10920](#)<sup>69</sup>] - Show skeleton of the Journal containing the dates after loading the configuration
- [[WD-10923](#)<sup>70</sup>] - React Journal Excel Export
- [[WD-10931](#)<sup>71</sup>] - Make save dialog when editing daily program to be the same like in weekly program and move "used in weeks" to different tab
- [[WD-10936](#)<sup>72</sup>] - Add caching for TaAbsenceReasonService
- [[WD-10937](#)<sup>73</sup>] - Hide the search and the show/hide columns options if the lazy loading is enabled
- [[WD-10954](#)<sup>74</sup>] - Add lazy-loading functionality to rp\_getOrgTreeTable.at and rp\_getScriptedTreeTable.act
- [[WD-10959](#)<sup>75</sup>] - Add failOnError for TaUpdateAttendantBehaviorToAbsenceReason (v26)
- [[WD-11017](#)<sup>76</sup>] - Make react context menu use webdesk.open instead of href
- [[WD-10751](#)<sup>77</sup>] - Add new property "attendantBehavior" to "TaAbsenceReason"
