

4.2.5

Release Notes - Webdesk - Version 4.2.5

Bug

- [WD-7347¹] - PtmStopAndContinueEfforts: job terminates abnormally due to too many persons in the system (>2100)
- [WD-8255²] - Travel expenses are wrong calculated when record with foreign currency is paid by company
- [WD-8401³] - If the Android Device ID is unfilled it should be null instead of an empty string which creates uniqueness false alerts
- [WD-8429⁴] - Kiosk falsely does not show a manually inserted effort as the last effort
- [WD-8458⁵] - Valid from has to be before valid to
- [WD-8460⁶] - "id to load is required for loading" exception after deleting person and selecting date
- [WD-8487⁷] - Process filter for sadmin not working any more
- [WD-8491⁸] - Roles can not be deleted in hr-expert
- [WD-8511⁹] - Regression: Filter buttons not working in editCurrency
- [WD-8578¹⁰] - Kiosk deletion fails because of missing delete log
- [WD-8579¹¹] - Trashbin: Kiosk restoration fails with NPE
- [WD-8630¹²] - Assigned requests- empty table after refresh
- [WD-8637¹³] - Regression: workflowlists throw exceptions in context of sadmin
- [WD-8645¹⁴] - WebpackConfig -> need to export multiple configs in webclient project
- [WD-8652¹⁵] - Person falsely still kiosk admin after removal from "All Kiosk Administrators"
- [WD-8668¹⁶] - "Incorrect result size" when changing kiosk device ID

New Feature

- [WD-7440¹⁷] - New Interface for monthly project time booking in %
- [WD-8185¹⁸] - When starting a new booking delete any immediately preceding bookings with less than 0min as unintentional
- [WD-8539¹⁹] - Monthly project % time booking - Project picker

Task

- [WD-8580²⁰] - Make sure existing webdesk.properties ClusterConfigs (RMI) continue working without manual reconfiguration

Improvement

- [WD-8254²¹] - Possibility to assign multiple kiosk admins
- [WD-8378²²] - Android Device ID of deleted kiosks shall be excluded from uniqueness check
- [WD-8453²³] - Clean up JMS properties in webdesk.properties
- [WD-8499²⁴] - Add Serializable interface to cached objects
