4.5.51

Release Notes - Webdesk - Version 4.5.51

Bug

- [WD-10088[1]] - doRescheduling page: weekly interval mode has a duplicated table column which appears only on IE
- [WD-10534[2]] - Problems with collapsed columns on React Table
- [WD-10744[3]] - Bundle Tomcat version 8.5.47 in installer
- [WD-10750[4]] - Pagination missing in ta_showAbsenceReasons.act
- [WD-10761[5]] - PDF/XSLX-Export on mobile not working with JS based implementation
- [WD-10767[6]] - ta_getGroupCalender: Make query-validation into the past relative from today working again
- [WD-10822[7]] - NullPointer Mappings Creating Empty TravelType KmBillingsDefinition
- [WD-10827[8]] - Mapping Widget Person and Group isn't Validated
- [WD-10835[9]] - Exception EditClient Travel Management Module
- [WD-10844[10]] - The navigation of the pagination is not working in dialog when saving daily program
- [WD-10855[11]] - Sorting order of weekly programs is wrong
- [WD-10866[12]] - On Organigram Page, the names are unaligned and not under the Role Title
- [WD-10877[13]] - Wrong date autocomplete in HRX
- [WD-10889[14]] - Exception when trying to create a travel folder
- [WD-10914[15]] - PostProcessHandler is not a function
- [WD-10926[16]] - Creating a new daily program throws an exception
- [WD-10952[17]] - Exception when using lazy loading for tree-table report
- [WD-10978[18]] - deleteOldWfData doesn't show all processes in log
- [WD-10979[19]] - deleteOldWfData can't close process instances because of DB constraints
- [WD-10983[20]] - Exception when clicking on Save and re-run daily accounting
- [WD-10989[21]] - Save dialog is displayed even if daily/weekly program is saved successfully
- [WD-10990[22]] - Avoid loading costly list of referenced process-definitions on open of wflist
- [WD-10997[23]] - Invalid data (out dated) problems when using the new Journal
- [WD-11002[24]] - JournalV2 does not load/shows nothing
- [WD-11003[25]] - Booking mask brings NPE when today has full-day-absence
- [WD-11008[26]] - JournalV2 does not load if no accounting column is defined
- [WD-11009[27]] - JournalV2 not all input fields shown adding accounting column
- [WD-11012[28]] - JournalV2 explort has some null entries when opening with Excel
- [WD-11018[29]] - JournalV2 today comments are not shown
- [WD-11025[30]] - JournalV2 holidays miss green background
- [WD-11030[31]] - Booking doesn't Appear in New Journal or rest/ta/journal Endpoint
- [WD-11038[32]] - Raise chache size to prevent timeouts from TACon
- [WD-11063[33]] - Saving Ta Client Data is way too slow

New Feature

- [WD-10368[34]] - Entity specific cache management
- [WD-10371[35]] - Cache Infrastructure for Journal V2
- [WD-10733[36]] - Hr-Expert page access should be logged as webdesk actions

Task

- [WD-10511[37]] - Create POJO to represent WfSimpleProcessDefinition and TaAbsenceEntrySimpleProcessDefinition
- [WD-10512[38]] - New method to find out which Absence Reasons a person can use, based on the process definitions it has permission to
- [WD-10513[39]] - New model that represents an Absence Reason with the process definition metadata bound to it
- [WD-10514[40]] - New TaAbsenceIntervalRestEndpoint
- [WD-10515[41]] - New TaAbsenceReasonRestEndpoint
- [WD-10516[42]] - Create new service WfSimpleProcessDefinitionService
- [WD-10659[43]] - Refactor and Improve Action Configuration model/services
- [WD-10768[44]] - System messages: make it possible to easily select multiple clients as system message target
- [WD-10834[45]] - Improvements for React Journal release
- [WD-10859[46]] - Refactor TaDefinitionStatisticsService, move methods to TaPersonService
- [WD-10860[47]] - Remove interfaces for the DAOs in TA and rename 6020 specific DAOs to ***6020DAO
- [WD-10864[48]] - Research integration of React components in HRX
- [WD-10880[49]] - Frontend Implementation of Lazy loading in TreeTableReports
- [WD-11033[50]] - Added and edited translations

Improvement

- [WD-900[51]] - TreeTable Reports ajaxified (webdesk/cocoon version)
- [WD-9944[52]] - Time columns should have the same width in "Frame", "Breaks" and "Accounts"
- [WD-9980[53]] - Improve Journal V2 endpoint
- [WD-9990[54]] - Error handling when there is a problem during the fetch of data of Journal V2
- [WD-10578[55]] - Make keyFieldName dynamic in WdReportTable
- [WD-10593[56]] - Improve Mappings Tab for definitions
- [WD-10644[57]] - StreetAddress validation in Travel Expense
- [WD-10680[58]] - Daily Time-Model maintenance should check impact and provide option to create copy
- [WD-10681[59]] - Allow archiving of day- and week-programs
- [WD-10722[60]] - Make the competence target for Role assignment prefilled if the admin user just has one client
- [WD-10759[61]] - Add JS State-Management for webdesk pages client-side
- [WD-10763[62]] - Move help messages to the right side and prevent removing target time hours when changing client when creating a new weekly program

- [WD-10845[63]] - Show dialog to create a copy of weekly program if they are already used (assigned)
- [WD-10852[64]] - Checking translations and fixing text modules
- [WD-10856[65]] - Logging for the job deleteOldWfData
- [WD-10887[66]] - Improve performance and rendering time of react journal
- [WD-10895[67]] - Set a realistic minimum year by default for React WdInlineYearPicker
- [WD-10907[68]] - Decouple websdk version from module version
- [WD-10920[69]] - Show skeleton of the Journal containing the dates after loading the configuration
- [WD-10923[70]] - React Journal Excel Export
- [WD-10931[71]] - Make save dialog when editing daily program to be the same like in weekly program and move "used in weeks" to different tab
- [WD-10936[72]] - Add caching for TaAbsenceReasonService
- [WD-10937[73]] - Hide the search and the show/hide columns options if the lazy loading is enabled
- [WD-10954[74]] - Add lazy-loading functionality to rp_getOrgTreeTable.at and rp_getScriptedTreeTable.act
- [WD-10959[75]] - Add failOnError for TaUpdateAttendantBehaviorToAbsenceReason (v26)
- [WD-11017[76]] - Make react context menu use webdesk.open instead of href
