

## 4.54.0

Release Notes - Webdesk - Version 4.54.0

---

### Zeiterfassung

- [[WD-15775](#)<sup>1</sup>] - IF2SQL: Export accounts in the right format
- [[WD-16144](#)<sup>2</sup>] - IF2SQL should not export all persons if no person matching a clientPrefix filter was found
- [[WD-16241](#)<sup>3</sup>] - The dashboard for users without a TA-ID is always displayed when it's configured to be the start action
- [[WD-16247](#)<sup>4</sup>] - JournalV2: The combined export doesn't respect the data change (date interval) from the user
- [[WD-15976](#)<sup>5</sup>] - Add CSV export feature to Journal table
- [[WD-15978](#)<sup>6</sup>] - Implement a custom button to "Save PDF and CSV files from JournalForExternalSystem"
- [[WD-15979](#)<sup>7</sup>] - Replace the current button Present/Absent with two independent buttons in webdesk dashboard
- [[WD-16059](#)<sup>8</sup>] - Add CSV export options in the action config of ta\_getJournalV2
- [[WD-15451](#)<sup>9</sup>] - Make IF2SQL export via job available in job logs
- [[WD-15633](#)<sup>10</sup>] - Add the "Show/Hide columns" feature to ta\_getJournalV2 too
- [[WD-15748](#)<sup>11</sup>] - Save state to action cache when changing columns visibility in JournalV2
- [[WD-15883](#)<sup>12</sup>] - Increase limit of timeCorrection intervals from 10 to 20
- [[WD-15908](#)<sup>13</sup>] - Persist absence reason settings in tacon.properties
- [[WD-16034](#)<sup>14</sup>] - Avoid blocking write operations while exporting to IF2SQL data warehouse

### Projektzeiterfassung

- [[WD-14920](#)<sup>15</sup>] - Mobile editTimeEfforts month view - useless empty day-panel at bottom
- [[WD-16228](#)<sup>16</sup>] - TA-PTM Time Correction: Wrong working time calculation after deleting middle interval
- [[WD-16230](#)<sup>17</sup>] - TA-PTM Time Correction: Problem with overlapping intervals validation (from ptm\_editTimeEfforts config)
- [[WD-16025](#)<sup>18</sup>] - TA-PTM Time Correction: Add option to calculate working time with the script

### HR-Expert

- [[WD-15915](#)<sup>19</sup>] - Show proper validation error message in HRX's save button

### UI/UX

- [[WD-15701](#)<sup>20</sup>] - The progress info slides in from the left unexpectedly
- [[WD-15743](#)<sup>21</sup>] - Fixed table header on WdOrgTable is not adjusting to collapsed SideMenu
- [[WD-15780](#)<sup>22</sup>] - New Edit Time efforts have broken bar
- [[WD-15961](#)<sup>23</sup>] - Correction client mobile view: Remove zebra styling of day contents
- [[WD-16003](#)<sup>24</sup>] - Journal V2 not showing well on mobile due to wrap issues

- [[WD-16172](#)<sup>25</sup>] - JournalV2 mobile remove unnecessary space between day "header" and content
- [[WD-15251](#)<sup>26</sup>] - Beautify the export button of the Journal v2

## System

- [[WD-12888](#)<sup>27</sup>] - Dynamic SameSite=none support for chrome
- [[WD-15026](#)<sup>28</sup>] - Webdesk-installer fails to connect to sql-server Database on 4.48+
- [[WD-15888](#)<sup>29</sup>] - NoSuchFieldExceptions when running hrPersonConnector
- [[WD-11185](#)<sup>30</sup>] - New relation m:n between PoKeyValue and PoLegislation
- [[WD-13710](#)<sup>31</sup>] - Upgrade velocity dependency
- [[WD-15687](#)<sup>32</sup>] - Move labor contract entity from HR to PO and assign to Legislation
- [[WD-15736](#)<sup>33</sup>] - Improve password reset for client admins
- [[WD-16018](#)<sup>34</sup>] - Support ndjson in PoRestEndpointJsonConnectorImpl
- [[WD-16023](#)<sup>35</sup>] - Job to execute UserDataPreloader tasks in the night
