GW System - Absence Reasons

Synchronizing absence reasons with the groupware system

To display absences from Webdesk in the groupware calendars, the following jobs must be configured:

- **SyncCalendarDates:** this job writes the absences entered in Webdesk EWP to the groupware system

In addition, the following system parameters must be set:

- **monthsToCheckInPast:** 0 - 12 or older;
  Controls how far into the past absence reasons from the time and attendance system are synchronized to the groupware system
- **monthsToCheckInFuture:** 1 - 12 or further into the future;
  Controls how far into the future absence reasons from the time and attendance system are synchronized to the groupware system
- **descPrefix:**
  Appointment name > the appointment name is extended by the prefix (wd_) that is placed before the absence reason.
- **allowedEntriesPostfix:**
  The appointment name is extended by the postfix "approved". This parameter is used to distinguish approved from unapproved absence reasons.
- **notAllowedEntriesPostfix:**
  The appointment name is extended by the postfix "unapproved", e.g. wd_Vacation_unapproved
- **absenceReasonsToSync:**
  1, 2, 3, etc. Numbers of the absence reasons from the time and attendance system that are to be synchronized
- **syncType:**
  0 or 1; 0 = approved and unapproved absences are synchronized, 1 = only approved absences are synchronized

For Exchange only:

- **busyStatus:**
  This parameter controls the status with which GW appointments are displayed in the Outlook calendar (visible in the "Show as" field).
  Available settings:
  - BUSY: appointments are displayed with the status "Busy"
  - OOF: appointments are displayed with the status "Out of Office"
  - TENTATIVE: appointments are displayed with the status "Tentative"
  - FREE: appointments are displayed with the status "Free"
