Function Setup and Customizing

Webdesk EWP offers various tools for the **management and personalization** of the different functions. In addition to personalizable **actions** (so-called configurations), the **menu tree** of the client, the **default language** and the individual **home page** of individual users can also be adapted to personal wishes.

Select the options you would like to learn more about:

Action management & action types[1]	Menu tree & menu tree configuration[2]
Languages & internationalization[3]	Configuring the home page[4]
