Rescheduling Overview

The rescheduling overview is used to display all reschedulings of the logged-in employee.

The following **details** can be queried via the **Rescheduling structure** field:

- Daily program scheduling --> select Daily programs
- Organization scheduling, such as floater duties --> select Organization
- display both --> select -- (= no selection)

Furthermore, the query can be started via the **View type** field for the following **periods**:

- **Month:** display for the queried month --> the respective month is selected using the arrow keys
- **Week:** the respective calendar week is likewise selected using the arrow keys
- **Year:** The entire calendar year is displayed at once; in the annual overview you can conveniently scroll down or up.
