Scheduling Categories

This is where the **categories** in which scheduling is to take place are defined.
Some examples:

- Organizational units - e.g. floaters, on-call duty, etc.
- Time models - e.g. daily schedules
- Activities - e.g. cash desk, back office, support, on-call duty, etc.
- Standby types, etc.
- **Category name**
  Enter the name for the scheduling category
- **Scheduling structure**
  Selection of the scheduling structure created first
- **Assigned to group**
  Select a group from the selection list. Once the selection has been made, the field disappears from the view.
- Foreign key
- Inactive
- Valid from - to
