Scheduling Overview

The scheduling overview displays all schedules that have been made. It is essentially identical to the scheduling form, but can only be read.

The following **details** can be queried in the overview:

- Daily schedule scheduling > select Daily schedules
- Organization scheduling, e.g. floater duty, on-call duty > select Organization
- Display of all scheduling entries > select --

Furthermore, the query can be started for the following **periods**:

- **Month** > Display for the queried month > the respective month is selected using the arrow keys
- **Week** > The respective calendar week is also selected using the arrow keys
- **Year** > The entire calendar year is displayed at once; in the year overview you can conveniently scroll up or down.
