

Sick note

General

The sick note is used to report a colleague sick. It is important to note that sick leave can only be registered for the current day and the previous day. For sick days longer in the past, an [Absences request](#)¹ must be submitted.

- **For**
The person for whom the sick certificate is to be made.
- **From date**
The date on which the sick leave starts (today or yesterday)
- **Absence reason**
Selection of absence reason (sick)
- **Comment**
Input of possible comments (possibly useful information for subsequent editors)

Sick note

For Huber Anna

From-Date 20/05/2021

Absence Reason sick

It is also important to know that the absence reason "**sick**" is automatically booked via this request until the employee books again in the system for the first time.

Using the **Show calendar** / **Group calendar** buttons, the applicant can display or hide his or her own calendar.

After starting the process, you are forwarded to the [Uncompleted Requests](#)² overview where you can see all your open requests sorted chronologically according to when they were created.

Approval process

Applicant (Requestor) --> human resources department / person responsible for viewing

The request is submitted to the personnel manager for viewing (i.e. kind of taking note).
