R3.5

System Requirements for Update

Due to changes in the database schema, an **update is only possible from a 3.3.x (or higher) version.** That is, it is not possible to update from a version older than 3.3 to the current version. This leads to problems when running the update scripts and then to inconsistencies in the DB schema, which subsequently prevent the correct start of the Webdesk server!

New Modules in This Release:

- Event Management[1]

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

3.5-GA

Bug

- [WD-150[2]] - TaCheckMaxWorkingTime: Send emails immediately
- [WD-196[3]] - Non-reproducible JavaScript errors
- [WD-261[4]] - TaCheckMaxWorkingTime bugs when the limit is exceeded (unnecessary and incorrect email)
- [WD-345[5]] - NullPointerException when opening the monthly journal
- [WD-379[6]] - Template File Connector: It should be possible to generate files with \r\n
- [WD-391[7]] - Linked connector performs an update even though the value has not changed
- [WD-423[8]] - Favorites settings are lost for some users (OrgActionHandler)

Improvement

- [WD-141[9]] - Also display additional fields of receipts in the travel file (tm_editTravelFolder.act)
- [WD-233[10]] - Email sending by jobs - No more abort on exceptions

New Feature

- [WD-51[11]] - Set record transformer to true via update script
- [WD-55[12]] - Correction client: Display long names of absence reasons in the month view as well.

Task

- [WD-381[13]] - TemplateFileConnector: Sensible encoding

3.5-RC2

Bug

- [WD-114[14]] - Problem with SIZE calendar

New Feature

- [WD-131[15]] - BIRT Reporting: It should be possible to suppress the HTML output via configuration
- [WD-133[16]] - BIRT Reporting: If the HTML output is too large, it should be aborted with an exception

3.5-RC1

Improvement

- [WD-7[17]] - Extend the date configuration parameter of the job "ExecuteAndSendReports" with the option "Next business day".
