### General

A click on "New person" starts the process for creating a new employee.

The following input mask then opens:

| Rerson   |  |   |                         |                  |
|--|--|---|-------------------------|------------------|
| 🔄 Speichern 🛛 🎦 Speichern & Schließen 🔅 Zurück |  |   |                         |                  |
| Vorname  | * Gültig                               |   | on                      | 06.07.2015       |
| Nachname                                       | * Gü                                   |   | s                       | 01.01.3000       |
| Einstellungen                                  |  |   |                         |                  |

|  |  |   | Passwort vergeben       |                  |
|  |  |   | Zeitpunkt der letzten F | Passwort-Vergabe |
| 🛅 Bankkonten                                   |  |   |                         |                  |

The fields marked with an orange star must be filled in while the unmarked fields are optional.

After entering your **first name** and **surname**, you have to select your company under **Client** and then a **group** to which the person should belong.

#### WARNUNG

Note: In principle, the required hierarchical Gruppen<sup>1</sup> groups (departments) should be created BEFORE persons are created, since a new employee must be assigned directly!

#### WARNUNG

Important: **After saving** the person, it **MUST** be **added** to at least the **loose group ''xxx-ALLE''** under the newly appearing tab Groups (not visible before saving). **Otherwise no menu tree** is available to the user after the login!

After selecting the client, the fields **User name** and **Personnel** number are automatically filled with fixed client-specific prefixes (in this example, "pb" and "0001"). Except for these two prefixes, the **user name** and **personnel number** can be freely selected - but must be unique within the company.

**ZEF Master record number** is automatically filled by the system and cannot be changed.

**E-mail notification** controls whether the user should receive an e-mail when new requests for approval / review are received.

**E-mail notification** as a deputy analogous to the point E-mail notification, only from the viewpoint of the deputy

Activates / deactivates the deputy regulation, i.e. the deputy is authorized / not authorized to approve proposals.

E-mail the e-mail address of the user to whom the notifications will be delivered.

As already mentioned, the other fields are optional and self-explanatory.

Once all fields have been filled in, the person can be created by clicking on **Save**. The successful saving is confirmed with a corresponding message (person 'Mustermann Max' was saved successfully!). Only **now** can the password for the user be reset to the default password (=user name) by clicking the **Reset password** button. This must be changed when the user logs in for the first time.

## **Password-Management**

After saving a person, the password of the user can be reset to the default password using Reset Password.

WARNUNG

Note: The **default password** corresponds to the **user name including prefix** (case sensitive!) and must be changed after the first login!

Mit Passwort löschen kann das Passwort des des Mitarbeiters gelöscht werden - ein Login ist danach so lange nicht möglich, bis mittels Passwort zurücksetzen wieder ein Passwort vergeben wurde.

## **People Management**

After successful saving, the additional tabs **Groups**, **Roles**, **Action permissions**, **In the competence area** of these role owners and **Modules** appear.

# Tab: Groups

Under **Groups**, you can change the assignment to a hierarchical group (organization chart) and add the assignment to a lot group.

## **Hierarchical Groups**

Here you can see that the selected user is currently assigned to the group PB-ENTW (Development) in the organization chart PB. With **Valid from** and **Valid to**, you can define a period in which the person is assigned to a particular group. Under **New Group**, you can select another group and define a time period for the validity of the group membership. The check mark at **with past** determines whether expired (past) group memberships should also be displayed in the list of group memberships.

As an example: Mr. Müller works until 02.05.2013 in the PB-ENTW group and is to belong to the PB-VERTR group from 03.05.2013. To realize this automatically, the Valid until date can already be changed to 02.05.2013 and the group PB-VERTR with Valid from 03.05.2013 can be saved under new group. Thus the group change takes place automatically on the specified key date.

WARNUNG

Note: A person can only be a member of one hierarchical group at a time!
