

Time Bookings

The booking mask allows you to perform on-line time-bookings.

In this process the system transfers time and date from the web server, it also provides the correct booking-rhythm (comes / leaves). Additionally you can also book various absence reasons, e.g. official absence, etc.

A message field allows you to post a note/message, such as "In a meeting until 12:00", "customer visit at XYZ", etc.

This message is displayed in the attendance tableau, and can be viewed by other colleagues.

The screenshot shows a web interface titled "Booking". At the top, there are three buttons: "Book" (with a blue arrow icon), "Refresh" (with a circular arrow icon), and "Show Journal" (with a list icon). Below the buttons, there are two columns of information. The left column is titled "New booking" and the right column is titled "Last booking".

New booking		Last booking	
Date	03.11.2010	Date	03.11.2010
Time	11:27	Time	11:27
Bookingrhythm	Geht	Last bookingrhythm	Kommt
Absence reasons	<input type="text" value="Anwesend"/>	Last absencereason	Anwesend

The "Show **J**ournal" button can be used to provide an overview over the monthly journal.

To hide the journal, click on the "Hide Journal" button, which appears automatically after clicking on the "Show Journal" button.

A successful time-booking is quitted with a server message, in case of non-conformance an adequate error-message will appear.
