R3.8.2

The following is a list of tickets exported from our release management system Jira and assigned to the release described:

Bug

- [WD-2368[1]] - Wrong deduction of meals if new allowance calc definition is used
- [WD-2374[2]] - wf_getOrgProcessInstances - no org tree available
- [WD-2398[3]] - Various problems with cache replication
- [WD-2411[4]] - ta_editRebookings: it's not possible to save the entered rebooking if the suggested maxValue is < 0
- [WD-2414[5]] - Text fields in table are too big
- [WD-2426[6]] - Button "Save and Forward" is displayed although it shouldn't be
- [WD-2436[7]] - Regression: Too many connections - editMenuTree
- [WD-2450[8]] - Reports not working anymore after changing
- [WD-2451[9]] - Attendance Tableau: anonymisation and suppression of reason code does not work
- [WD-2459[10]] - Strange "toInclusive" behavior in travel expense

Improvement

- [WD-2433[11]] - ta_getCalender additional columns: special cases
- [WD-2444[12]] - Allow passing parameters from corporate view calculator to taxfree view calculator

Task

- [WD-2407[13]] - Backport Groupwise changes to 3.8
