

Webdesk Update

General information

This article describes the steps required to upgrade an older version of the Web Desktop to a Webdesk 4.x.

WARNUNG

Older Webdesk versions than version 3.8, you must **first update to 3.8**, before a problem-free update to 4.x is possible!

NOTIZ

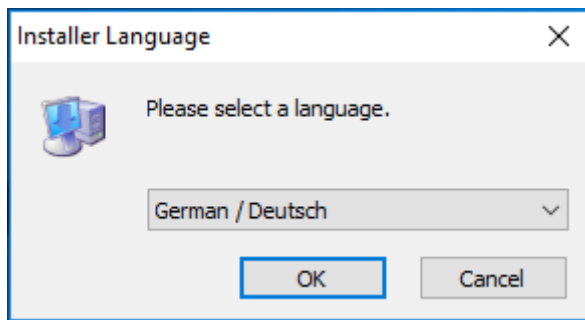

Webdesk is available in a 32-bit or 64-bit version.

Steps in detail

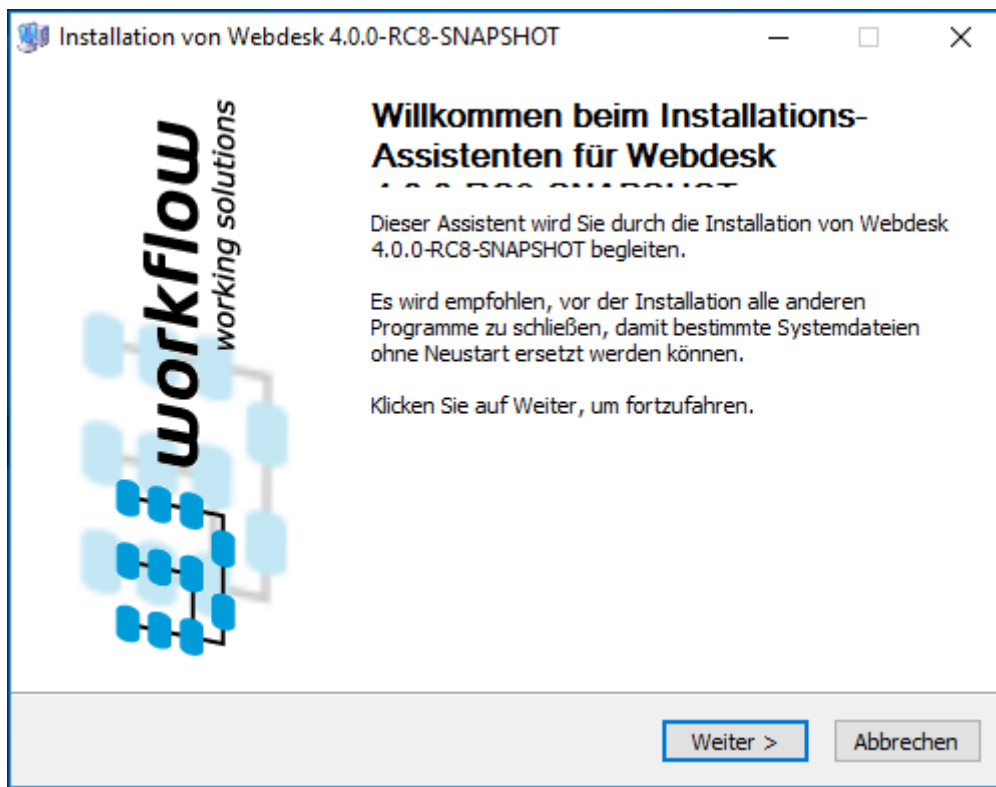

- Quit the Webdesk server service in the Windows services

- Double-click the file setup-xxx-xxbit.exe
- Choose your language

- Welcome screen appears, Next

- Installations-Variante: Update (Webdesk is already installed) is checked, next

- the Update gets done

- Installation completed successfully!
"Start Webdesk" und "Start Web-Browser for Webdesk" are checked, next

- Complete the installation with Finish

- At the same time, the web browser opens a window with the Webdesk in it
