Tab Employment - Employment

In this area, the complete employment data is maintained and tracked with history.

Furthermore, this section makes it possible to record secondary jobs[1], to document parental leave and maternity protection periods[2], to enter restrictions and extensions regarding work capacity (disabilities[3], permits[4], disciplinary proceedings[5]), and to note a possible termination procedure[6].

Information on the individual fields of the tabs on the topic of employment can be found under Employment Field Index[7].
